Optics and Laser Technology

Index to volume 3 1971

Articles, Papers & Notes

18 Autocollimating focus sensor for optical systems of high angular resolution, *J. R. Vyce*

131 Basic theory of multilayers, The, *A. Thetford*

12 Carbon dioxide lasers—an introduction to their characteristics and design, *C. R. Stanley*

229 Critical adjustments of correlation filters for optical character recognition, *A. Dickinson & B. M. Watrasiewicz*

98 Design and construction of kaleidoscopes to modify the energy distribution in the image plane of the AWRE arc image furnace, The, *A. G. Hunt*

211 Experimental technique for the measurement of the speed of the rolling elements in a roller bearing using a laser velocimeter, An, *G. R. Bremble, M. J. Lalor, & J. W. Cleaver*

140 Four-pole transducer anologues of electro-optic modulators, *M.S. Ahmed & H. Schroter*

136 High speed interferometer system for flame propagation studies, A, *M. Marchant, J. A. Cobb, & R. N. Butlin*

83 Holographic decoding of three-dimensional objects, *F. Lanzl,*

220 Holographic interferometer comparable with an in-line reference field laser speckle interferometer, A, Denby, D.

36 Holographic interferometry for testing homogeneity of large optical glass blanks, *A. Masumura, M. Matsukawa & T. Asakura*

31 Influence of thermal lens effects on the resonator geometry of gas lasers, *H. H. Witte*

150 Infrared applications of the pyroelectric effect, *E. H. Putley*

144 Infrared detectors for the range 1·5–30μm, *C. R. Stanley*

5 Infrared gauging, *R. F. Edgar & P. H. Hindle*

69 Institut d'Optique Theoretique & Appliquee. An account of research facilities at Paris and Orsay, *A. Marechal*

93 Interferometric studies of the interaction of focused Nd-laser-radiation with thin absorbing surface layers, *M. Hugenschmidt & K. Vollrath*

200 Laser anemometer, The, *M. J. Rudd*

224 Laser calorimeter for three orders of energy level, *B. Farmer*

104 Measurement of signal-to-noise ratio in hologram reconstructions by vibration interferograms, *K. A. Stetson & K. Singh*

86 Multiple-pass interferometry by a gated-pulse technique, *W. Thomson & J. B. Humphreys*

10 Optics at Pilkington Perkin-Elmer, *D. W. Swift*

76 Photodetectors for laser applications, *P. J. R. Laybourn*

232 Pohlman cell as a means of producing acoustic holograms, The, *A. J. Lafferty & R. W. B. Stephens*

74 Promotion of the optics industry by NRDC

234 Recent developments in fibre optics at Rank Kershaw

71 Recording distortion in irregularly shaped objects, *R. W. E. Cook*

41 Refractive index and thickness variations of photographic emulsion, *R. L. van Renesse & N. J. van der Zwaal*

23 Remote measurement of mean wind velocity and turbulence by laser anemometry, *P. J. Bourke & C. G. Brown*

89 Rotating-mirror wavelength shifter, *N. Niewenhuizen & C. Veth*

215 Simulation of a double 45°, z-cut KD*P, electro-optic Q-switch by desk-top computer, *J. Warner*

32 Some characteristics of multibeam holography, *J. Politch, J. Shamir, & J. ben Uri*
Special Supplement on Electro-Optics '71 International, 23-25 March, 1971 (Published in May 1971)

26 Speckle pattern and holographic techniques in engineering metrology, *J.N. Butters & J.A. Leendertz*

157 Study of the linearity of response of a holographic photosensitive emulsion, *J. P. Prenel*

67 'Tangled skein', A, – Fibre optics, *K. R. Coleman*

218 Temperature dependence of the dielectric properties of SBN in the frequency range of 10 kHz – 10 MHz, *E. Elsen, J. Grabmaier, & P. Graf*

45 300 mW folded He-Ne laser, A, *S. Scheuermann & G. L. Ritter*

208 Traversing laser velocimeter, A, *K. A. Blake, K. I. Jespersen, & D. Lynch*

195 Use of holography for visualization of the wake of projectiles in hypersonic flight at Mach 6, *A. Hirth, P. Smigielski & A. Stimpfling*

Patent Surveys

47, 109, 162, 236,

Recent developments

253 Acoustic microscope

249 Angular positioning from remote locations

189 Argon ion laser

58 Character recognition

58 Chemical laser systems

256 Cold working photo-cell

187 Constant focus

127 Contemporary Optics '70

256 CO_2 laser beam monitor laser detects air pollution

251 CO_2 trimmers

189 Cross-field scan laser

125 'Dial-a-clean' disc for components and systems

187 Diamond driller sold

121 Electro-optic antenna scanning

255 Electro-Optics International '72

59 Ellipsometry and surface layers

181 First European Electro-Optics Markets and Technology Conference and Exhibition, The

191 Gimbals for limitless applications

63 Glass laser

122 Grating end reflectors

187 Highest telescope

123 High-speed colour printing

61 Holographic diffraction systems

122 Holographic photography particles

249 Improved laser searchlight

60 Infrared systems

191 Irish lasers

251 Lapping and polishing machine

59 Laser beam deflector

123 Laser beam fire detector

60 Laser beam scanning

60 Laser cooler

256 Laser detects air pollution

59 Laser for pulsed holography

253 Laser in orbit

61 Laser photometer

189 Laser Raman spectrometer

125 Lasers for temperature measurement

181 Lasers – high-power and low-power

187 Lens bonding cement
62 Light sensitive array
59 Live 3-D television
189 Microwelder
61 Miniature spectral lamps
58 Minute semiconductor laser
253 Moisture measurement
255 New address
60 Oculometer for tracing eye movements
60 Physics in 1970
249 Picosecond dye laser pulses
125 Picosecond pulses measured
255 Plastic guides
62 Radiation proof glass
62 Rotating Q-switch
185 Some aspects of optics at NPL
127 Summer school
191 Tunable infrared laser
255 Useful reprints
127 Weight analysis
191 Zigzag laser

Books reviewed

246 **Advances in Quantum Electronics (Vol 1)**, ed by D. W. Goodwin
247 **The Applications of Holography**, by H. J. Caulfield and Sun Lu
119 **Coherent Light**, by A. F. Harvey
56 **Glass Lasers**, by W. Patek
247 **Guide Book of Japanese Optical Precision Instruments 1971-72**
246 **Interferometry as a measuring tool**, by J. Dyson
178 **Lens Aberration Data**, by J. M. Palmer
179 **Liquid Crystals and Their Applications (State of the Art Review No. 2)**, ed by T. Kallard
56 **Multiple-Beam Interference Microscopy of Metals**, by S. Tolansky
180 **Optical Instruments and Techniques**, ed by J. Home
120 **Optical Properties of the Sea**, by J. Williams
120 **Optics**, by M. V. Klein
180 **Progress in Optics – Volume 8**, ed by E. Wolf
178 **Quantum Optics**, ed by S. M. Kay and A. Maitland
180 **Quantum Optics**, ed by R. J. Glauber
56 **States, Waves and Photons**, by J. W. Simmons and M. J. Guttman
179 **University Optics: Volume 2**, by D. W. Tenquist, R. M. Whittle and G. Yarwood

Conference Reports

174 American Ceramic Society Meeting, (April 1971)
52 British contingent well received, (September 1970)
116 The laser as a production tool! (March 1971)
55 Microwave and laser instrumentation, (September 1970)
54 Optical techniques, (September 1970)
174 Optical techniques and lasers in industrial applications
52 Optical investigations in the upper atmosphere, (September 1970)
171 Optical Society of America meeting, (April 1971)
169 Optics in microelectronics, (January 1971)
172 Seminar in depth – Holography '71, (April 1971)
170 The study of flow and turbulence by laser dopper techniques, (March 1971)
244 Visual performance through optical instruments, (July 1971)

Authors
